CONDUIT MOUNT BRACKET

The Conduit Mount Bracket utilizes EcoFasten's patented watertight technology. It is embossed with a patented cone shape countersink and can be used as a watertight solution on a variety of roof types. The Conduit Mount Bracket can be used with GreenFasten GF1 flashing on a new or retrofit composition shingle roof, or with a Simple Seal bushing for use on metal roofing. The bracket is raised to lift electrical conduit off the roof, preventing the wiring from overheating. Conduit Clamp not included.

COMPOSITION SHINGLE

FEATURES / BENEFITS

- Mounts conduit off the surface of the roof to meet code
- Bracket can be positioned in North-South or East-West orientation
- Watertight seal
- Compatible with a variety of mounting systems
