ECOFASTEN

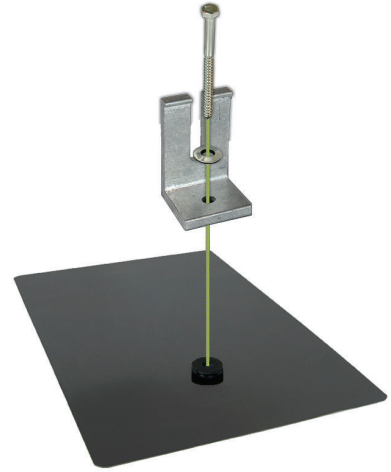

GREENFASTEN

The GreenFasten GF1 flashing for composition shingle roofs is trusted industry-wide. Its patented watertight seal forms an impenetrable moisture barrier and is compatible with a variety of EcoFasten compression brackets. GreenFasten GF1 has been extensively tested for uplift and shear.

FEATURES / BENEFITS

- Watertight seal
- Installs without removing shingles
- One lag bolt for attachment at a single point penetration
- Compatible with a variety of compression brackets (see below)

Allowable Load Test Data

Load Direction	Bracket	Allowable Load
Uplift	L-102-3	653 lbs
Shear	L-102-3	304 lbs
Uplift	SCL-101-3	604 lbs
Shear	SCL-101-3	273 lbs

Standing Water & Rain Leak Tests

The GreenFasten System showed no indication of leaking. The testing apparatus was flooded and pressurized to 30psi and let stand for over 10 minutes. This is the equivalent to 70ft of standing water.

The GreenFasten system was rain tested and evaluated by IAPMO Uniform ES (report ER-216) in conformance with UL 441-96, Section 25.

CONNECT WITH ECOFASTEN

**QUICK
RELIABLE
INNOVATIVE**

EcoFasten develops, engineers and supplies solar rooftop mounting solutions for the commercial, industrial and residential markets. Built on continuous innovation, rigorous quality and attentive customer service, EcoFasten has more than 6 GW of installed capacity worldwide. All mounting systems are designed and developed by installers for installers. EcoFasten has simplified installations with the fastest, most economical mounting solutions on the market.
