QUIKFOOT

QuikFoot is a solar roof mount system designed for installation on new or existing (retrofit) composition shingle or slate roofs. QuikFoot includes a base plate installed with two self-drilling fasteners, providing optimum uplift and fast installation. When paired with an EcoFasten compression bracket, the QuikFoot flashing creates a watertight seal that will maintain the roof's integrity.

FEATURES / BENEFITS

- Watertight seal
- Installs without removing shingles
- Two Self-drilling screws for optimum pullout value
- Compatible with a variety of compression brackets (see below)

Allowable Load Test Data

Load Direction	Bracket	Ultimate Load	Allowable Load*
Uplift	L-102-3	1600 lbs	836 lbs
Shear	L-102-3	2508 lbs	533 lbs

*Allowable Load = Lowest Ultimate/F.S. 3.0

Pressurized Rain Leak Tests

The QuikFoot System showed no indication of leaking. The testing apparatus was flooded and pressurized to 30psi and left stand for over 10 minutes. This is the equivalent to 70ft of standing water.

The QuikFoot System was tested in accordance with ICC-ES AC286 § 4.1 (UL 441 Section 25 test procedure).
