TILE FLASHING SYSTEM

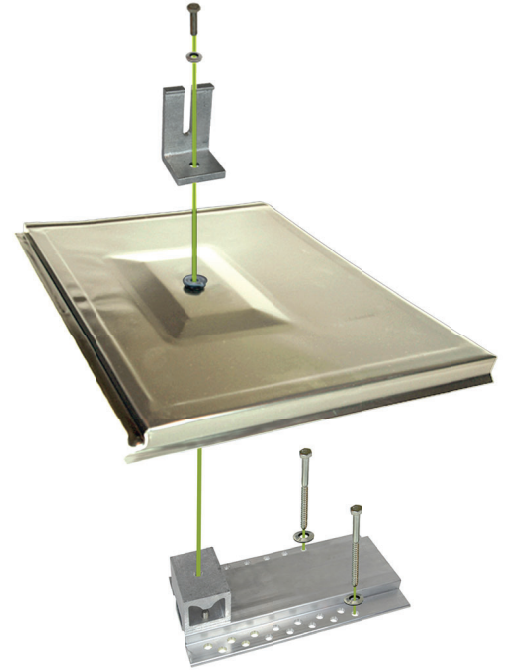

ROOF ATTACHMENT
FOR TILE ROOFS

ECOFASTEN

TILE FLASHING SYSTEM

Tile Flashing System, designed for use on new or existing (retrofit) tile roofs, is available in Flat, W & S profiles. This innovative system replaces one complete roof tile, eliminating the need for cutting, drilling, or grinding of tiles. Multiple fastener holes in the system's base plate allow for attachment into the rafter, regardless of the flashing alignment. The embossed cone-shape stamped into the flashing and fitted with a rubber bushing creates a watertight seal when paired with an EcoFasten compression bracket.

FEATURES / BENEFITS

- Watertight seal
- One-tool installation
- Replaces a complete tile
- No need for the cutting, drilling, or grinding of tiles
- Compatible with a variety of compression brackets (see below)
