

CONDUIT MOUNT

CONDUIT SUPPORT FOR ALL ROOF TYPES

The Conduit Mount Brackets can be installed on a variety of roof types to lift electrical conduit off the surface of the roof, preventing wiring from overheating. The bracket features EcoFasten's patented watertight technology and can be paired with a GF-1 flashing on new or retrofit composition shingle roofs. The bracket can also be combined with a SimpleSeal bushing for use on metal roofing. A conduit bracket for tile is also available.

FEATURES & BENEFITS

- Mounts conduit off the surface of the roof
- Pipe clamp can be mounted in any orientation
- Compatible with a variety of mounting systems
- Patented Watertight Technology
