

SIMPLE SEAL

WATERTIGHT SEAL FOR ECOFASTEN BRACKETS

SimpleSeal is a cone-shaped EPDM rubber bushing that fits into the countersink milled into the underside of all EcoFasten compression brackets. SimpleSeal is suitable for installation on various metal roof types. When the bracket is secured to the roof by attaching it to a purlin or rafter, the SimpleSeal bushing becomes compressed between the bracket and the roof, resulting in a completely watertight seal.

FEATURES & BENEFITS

- Patented watertight technology
- Minimal components
- Compatible with a variety of EcoFasten compression brackets

ECONOMICAL & VERSATILE MOUNTING SOLUTION FOR METAL ROOFS
