

SIMPLE GRIP-SQ[®]

SELF-FLASHED SOLUTION FOR ROLLED & MEMBRANE ROOFS

SimpleGrip-SQ is designed to attach PV modules to rolled and membrane roofs with pitches from 1/4:12 to 21:12. The SimpleGrip Base is compressed between two layers of watertight adhesive for a fast and easy installation without additional flashing. The compression plate protects the adhesive and features an EPDM grommet. When combined with any EcoFasten bracket, a compression seal is formed.

FEATURES & BENEFITS

- Patented watertight technology
- Four self-drilling screws provide optimum uplift and a fast installation
- UV ray shielded mastic prevents degradation
- Installs without cutting into the roof

ADHESIVE SEALANT FLASHES THE MOUNT COMPLETELY
