

SIDE CLIP

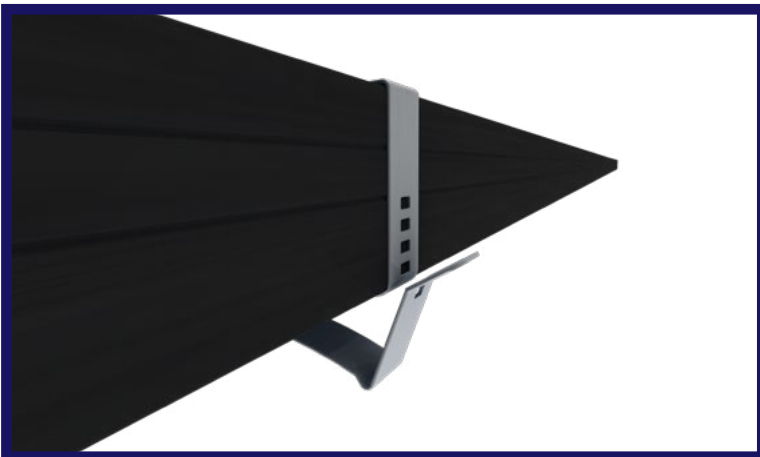

INSTALLATION GUIDE

INSTALLING THE SIDE CLIP

Use the properly sized Side Clip for the module frame thickness. Place the Side Clip on the side edge of the module frame, with the hook's top portion resting on the top edge of the frame.

Roll the Side Clip so that the bottom portion clicks into place at the bottom edge of the module frame.

Place the wires inside the Side Clip. Secure up to four (4) 10AWG wires or up to six (6) 14AWG or equivalent bundled diameter wires inside the Side Clip.
