SIDE CLIP

GAME-CHANGING FRAME EDGE WIRE CLIP

Introducing EcoFasten's innovative Side Clip – the ultimate module frame wire management solution. The easy to install clip provides a reliable way to manage wires on module frames without the hassles of traditional wire clips. Our Side Clip can hold up to six wires, and works perfectly on modules with small or no flanges, offering a secure fit that won't fall off. Ideal for managing wires for micro-inverters, power optimizers, PV leads, and homeruns, Side Clip is designed to make your installation neater, faster, and more reliable.

Side Clip is offered in three standard module frame thicknesses—30MM, 32MM, and 35MM—and a versatile Universal option that easily adjusts to fit 30MM, 32MM, 35MM, and 40MM frames.
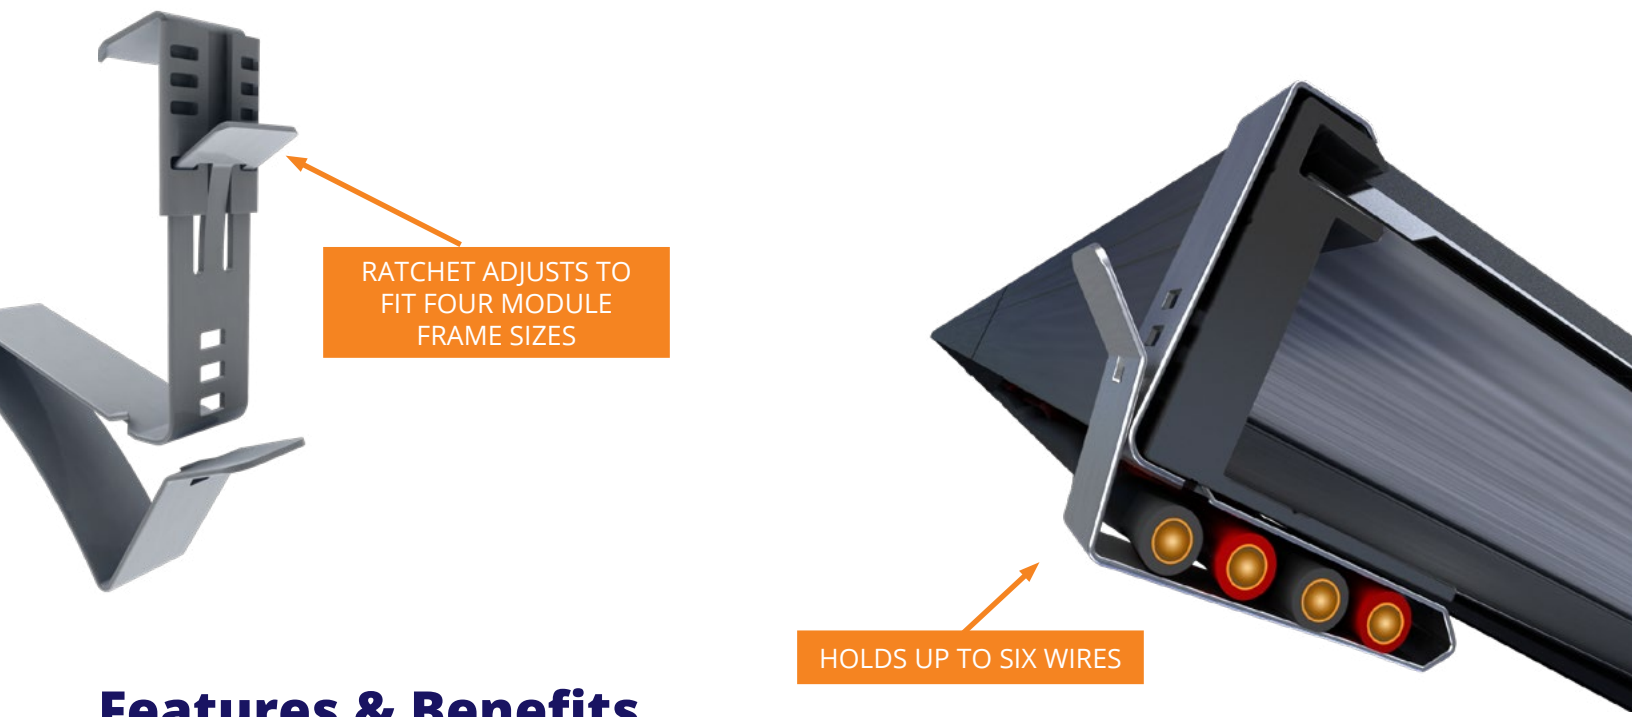

Available Components:

Part Number:	Description:
4011021	SIDE CLIP 30MM
4011022	SIDE CLIP 32MM
4011023	SIDE CLIP 35MM
4011024	SIDE CLIP 30MM, 32MM, 35MM, 40MM

SIDE CLIP

UNIVERSAL SIDE CLIP

RATCHET ADJUSTS TO FIT FOUR MODULE FRAME SIZES

HOLDS UP TO SIX WIRES

Features & Benefits

- Accommodates up to six (6) PV wires or three (3) Q-Cables

- Easily install by hand, even when wearing gloves

- Clamps securely around all wire sizes, ensuring a firm grip that prevents slipping and stays secure throughout installation and the array's life

- Ratcheting feature locks wires into place and can be unlocked to remove or add wires as needed

- Installs on module frames with any sized flange, or no flange

- One-size-fits-all for MLPEs, PV wires, and homerun wires

- Will never fall off, eliminating truck rolls for dangling wires

- Universal Side Clip option adjusts to fit 30MM, 32MM, 35MM, and 40MM frames

MID CLIP

CAPTURE & SECURE DANGLING WIRES

Introducing the EcoFasten Mid Clip – the perfect solution for eliminating dangling wires under the array without having to remove modules. Simply capture the wire between two modules with the long hook, draw the wire tight, push the clip down between the modules and bend the hook over the clip for a clean look. Compatible with .06" module gaps or greater, Mid Clip is a quick, easy, and tool-free solution.

MID CLIP

Features & Benefits

- Made of stainless steel for long-term durability
- Installs quickly and easiliy without the use of tools
- Eliminates the need to remove modules to manage wires during and after installation
- Accommodates any diameter wire
- Barbs on the sides bite into the module frames preventing any loosening over time
